Dear Colleague,

On behalf of Bayer plc, we are delighted to invite you to a UK Bayer Summit: The changing landscape of peripheral artery disease management, an educational meeting designed to bring together healthcare professionals from vascular medicine responsible for managing patients with peripheral arterial disease (PAD). This national CME meeting will be held at the Royal College of Physicians, 11 St Andrews Place, London NW1 4LE on Tuesday 26 June 2018.

The meeting, organised and funded by Bayer plc, will focus on the diagnosis, staging and management of PAD, exploring the challenges and complexities of peripheral vascular disease and identifying ways in which outcomes can be improved. It will also explore the role of the MDT approach in managing patients with PAD.

There will be opportunity to hear from national and international experts within the fields of vascular medicine, including the sharing of current best practice and the latest clinical and therapeutic advances. The programme has been designed to encourage maximum attendee participation with a combination of didactic and interactive sessions that will provide a forum for sharing best practice and discussing the future of PAD management.

Invitations are open to secondary care healthcare professionals, and delegate spaces will be allocated on a first-come, first-served basis. To confirm your attendance please register for the meeting by email: registrations@LCWmed.co.uk or by phone on: 01444 412 772.

Lunch will be available and light refreshments will be offered throughout the day. Please state any specific dietary requirements when registering.

An application has been made for this educational event to be accredited for Continuous Professional Development (CPD). We hope you will be able to join us and look forward to hearing from you soon!

Yours sincerely,

Professor Jill Belch
Meeting Chairman
